

ALPINE PASTURES

PROJECTS

ALPINE PASTURE REVITALIZATION CARINTHIA, SALZBURG, STYRIA / AUSTRIA

Project description

Within the Alpine Pastures Revitalization projects measures for the melioration of alpine pastures are being prepared in cooperation with the involved farmers. Besides of clearing activities (removing of trees and dwarf shrubs) adapted fertilization and small scaled corrections of the terrain are the most required measures of the "Activity plan ". In addition to alpine farming concerns also nature conservation and forestry issues are being taken into account within the individual activity plans.

The submitted plans are a prerequisite for public subsidies for alpine pasture revitalization projects.

Services

- On-site assessment of the project sites
- Preparation of individual action plan for alpine pastures
