## SIGNPOSTING AND VISITOR MANAGEMENT PROTECTED AREAS IN CARINTHIA / AUSTRIA

### Project description

In Carinthia there are intentions to establish a consistent signposting system for all protected areas.

Comprehensive inquiries into infrastructure, user groups and visitor behavior as well as analyses of problems and conflicts concerning land-use serve as basis for the definition of signposting activities.

All visitor management and signposting activities in protected areas have been defined in close cooperation with the responsible or involved institutions, respectively.

### Services

- Inquiries on natural assets and visitor behavior in protected areas
- Preparation of a visitor management concept
- Content related conception of the signposts
- Graphic implementation

### Client

Office of the Carinthian Government, Dept. Regional Planning,  
Subdept. Nature Conservation  
2007-2009

Dipl. Ing. Andreas Berchtold  
landscape architect
