

SPATIAL AND REGIONAL PLANNING

PROJECTS

URBAN DEVELOPMENT CONCEPT KLAGENFURT 2010+
TARGET AREA KLAGENFURT WEST
KLAGENFURT / AUSTRIA

Project description

Based on given social, ecological and cultural conditions the urban development concept defines the aims of the local spatial planning for a planning period of 10 years.

The western part of Klagenfurt spreading towards the lake Wörthersee is one of the main urban development axes within the general spatial planning principles of the town. Due to the increased pressure of housing development it represents a "hot spot" of urban development in Klagenfurt. Within the Urban development concept Klagenfurt 2010+ the planning activities for this part of the town are focused on following key-issues:

- Housing development
- Limits of urban development
- Consistent advancement as a science and technology location
- Development of the protected areas and their surrounding landscapes
- Development of leisure and recreation zones
- Development of tourism infrastructure

Client

Municipal authority of Klagenfurt, Dept. Urban Planning
2010-2011

Dipl. Ing. Andreas Berchtold
